Subject: Saskatchewan Ministry of Highways and Infrastructure Spring Road Restriction Bulletin 2020
Attachments: Spring Road Restriction Bulletin RM 2020.pdf

Good afternoon all,

The Saskatchewan Ministry of Highways and Infrastructure Winter Weights season will be soon coming to an end and Spring Road Restrictions are fast approaching, please review the attached Spring Road Restriction Bulletin for 2020, updated procedures and contact formation for opting in and out of Minister Orders.

If you have any questions regarding the time lines in the attached bulletin please contact the Road information Manager stated in the Bulletin.

Spring road restrictions are dependent on weather. Typically, these road restrictions start in the first week of March in the southwest of the province, and the remainder over a two -three week period.

Official spring restriction orders are issued every Tuesday and Friday (with the exception of Good Friday) by 12:30 p.m. (CST) during the ban period.

When restrictions are implemented, they may be in place for up to six weeks. Restrictions may change with 48-hours-notice. If a prolonged weather cold period occurs, the weight restriction may be removed until weather conditions warrant it.

The new order is the latest publication and would indicate any changes to the previous order. This order will come into effect on the following Thursday at midnight or the following Sunday at midnight, depending on the day of publication. You should view both orders as this will provide a one week window on restrictions.

Maximum Gross Weights During Spring Road Bans (Restrictions)

Configuration	Tire Size	Max. Gross Weight
2 Axle Truck	9" with rear dual	10,305 kg
2 Axle Truck	10" with rear dual	11,430 kg
